

## Personal Statement

---

A passionate Front-End Developer and problem-solving enthusiast with a solid foundation in programming and web development. Dedicated to continuous learning and personal growth, with an exceptional academic record (GPA: 89.7%) and the ability to tackle challenges effectively.

## Technical Skills

---

- **Programming Languages:**
  - C++ and C# for building high-performance applications and games.
  - Object-Oriented Programming (OOP) for effective code organization with object-based design.
- **Front-End Development:**
  - HTML and CSS for designing and creating web pages.
  - JavaScript for dynamic functionality.
  - Bootstrap and React.js for developing modern, interactive user interfaces.
- **Back-End Development:**
  - Node.js for server-side development.
  - MySQL for efficient database management.
- **Advanced Frameworks and Technologies:**
  - Next.js for fast and optimized web applications.
- **Version Control Tools:**
  - Git and GitHub for code management and collaborative development.

## Personal Skills

---

- **Teamwork:**
  - Collaborates effectively with team members to achieve shared goals.
- **Communication:**
  - Strong verbal and written communication skills in both Arabic and English.
- **Problem-Solving:**
  - Analytical mindset with the ability to approach challenges methodically.
- **Adaptability:**
  - Quick learner, capable of thriving in dynamic environments.
- **Time Management:**
  - Organized and punctual, ensuring deadlines are met.

## Education

---

- **Bachelor's Student in Computer and Automatic Control Engineering:**  
University of Latakia (formerly Tishreen University) | 2021 – Present
- **High School GPA:** 89.7%

## Achievements and Activities

---

- **2023 Programming Contest Participant:**  
Demonstrated exceptional problem-solving skills during participation in the programming contest organized by the University of Latakia (formerly Tishreen University).
- **Hassoub Academy online course:**  
Enrolled in the Hassoub Academy online course on programming and Front-End Development.
- **self-learning:**  
Acquired expertise in problem-solving and Front-End Development through self-learning in 2023–2024.
- **Fluent in Arabic (native) and English**
